

Order SEO Articles

What you get with an SEO Article Order:

SEO Articles:

Properly Optimized Articles should be 450 - 500 words in length and have a keyword density of approximately 4% - 7%. Further we target a Flesch Kincaid score that meets the target audience appropriately. We will review your site to determine the best writing style to match your current content. SEO content should also be created with compelling copy that gets the page visitor to perform a desired action, whether it be completing a lead form, signing up for a newsletter, or making a purchase.

We don't simply slap words on a page. You should be careful when using freelance writers and other "SEO" article sources as they often do not give very good results. We have PROVEN Search results for our optimized articles. We are an SEO company not just an article source, and we count on our content creation to deliver results.

SEO Article / Content Pricing:

Articles Only: (Delivered in Text format at appropriate density)

Article / Content Creation Agreements (Content delivered over time)

One of the best strategies in Search Engine Optimization is to have fresh content added to your site regularly. Discounts are available on the listed pricing if you intend to have content created for you for 3 or more months.

When you make an article request a representative will contact you and discuss your needs. We want to insure that you get the best possible results THE FIRST TIME. Simply filling out a form will not properly convey your goals. Personalized service insures that you get top results.
